## SUMMARY

Dynamic and motivated Computer Science student with a solid foundation in programming and web development. Adept at creating engaging user interfaces and implementing backend functionalities to enhance user experience. Passionate about leveraging technology to solve real-world problems and continuously learning new skills to stay updated with industry trends.

## EDUCATION

### MERI College of Engineering and Technology, New Delhi

Bachelor of Technology

2021 - 2025

Grade: 7th Semester

### Queen's Valley School, New Delhi

12th

2020 - 2021

Grade: 84.2%

### Queen's Valley School, New Delhi

10th

2018 - 2019

Grade: 87.4%

## EXPERIENCE

### Waisl, Digital Team

Front-End Developer Intern

- Contributed to the development of user-friendly interfaces, enhancing user experience and accessibility across digital platforms.
- Collaborated with the digital team to implement responsive designs, ensuring seamless functionality across various devices.
- Gained valuable insights into the aviation sector, specifically in understanding airport operations and services.

## PROJECTS

### Virtual Wardrobe Assistant

Major Project

- Developed a web application that provides outfit suggestions based on weather conditions, enhancing user convenience.
- Implemented backend functionalities using Flask and SQLite to store and retrieve user data efficiently.
- Designed an intuitive user interface using HTML, CSS, and Bootstrap, ensuring a seamless user experience.

### Dynamic To-Do App

Major Project

- Created a task management application to help users organize their tasks effectively.
- Utilized JavaScript for dynamic content updates and user interactions.
- Ensured cross-device compatibility with responsive design techniques.

### Food Much

Minor Project

- Developed a responsive restaurant website to showcase menu items and restaurant details.
- Implemented user-friendly navigation and interactive elements using JavaScript.
- Ensured optimal performance and accessibility across various devices.

## SKILLS

- Programming Languages:** Python, JavaScript, HTML, CSS
- Frameworks and Libraries:** Flask, Bootstrap
- Databases:** SQLite, MySQL
- Design Tools:** Figma
- Soft Skills:** Problem-solving, Communication, Team Collaboration
- Languages:** Hindi, English
